

铝杆技术改进说明

Aluminum rod technology improvement instructions

老款 The old one

新款 The New one

新款铝杆相较于老款铝杆，无论在结构还是性能上面都有很大的提升。
Compared with the old aluminum rod, the new aluminum rod has a great improvement in structure and performance.

1、新款铝杆较老款铝杆做对比：中间黑色护盖，安装把手后，防止拨叉外漏，比老款更美观。

The new aluminum rod is compared with the old aluminum rod: the black cover in the middle, after the handle is installed, prevents the leakage of the fork, which is more beautiful than the old model.

2、新款铝杆较老款铝杆：两头安装了静音装置，滑动起来更顺畅，没有噪音。
New aluminum rods are older than aluminum rods: mute devices are installed at both ends.
