

传动器改进说明

Transmission improvement instructions

新款传动器相较于老款传动器，在性能上有很大的提升。

Compared with the old models, the new actuators have greatly improved their performance.

老款 old style

新款 the new

新款与老款相比，改进细节如下：

Compared with the old model, the details of the improvement are as follows

老款 old style

新款 the new one

老款的传动器锁点是空心的，在下雨时容易进水，影响使用效果。新款传动器锁点是实心的，质量更好，更持久耐用。

The lock point of the old transmission is hollow, which is easy to get water when it rains, which affects the use effect. The lock points of the new actuators are solid, better quality and more durable.
