

“福瓶” 把手改进说明 "Fu Ping" handle improvement instructions

新款把手相较于老款把手，在性能上有很大的提升。

Compared with the old handle, the new handle has a great performance improvement.

产品外观 Appearance

新款与老款相比，改进细节如下：

Compared with the old model, the details of the improvement are as follows

老款 old style

新款 the new

老款把手与方轴接触的底座材质是塑料的，耐磨性差。而新款把手与方轴接触的底座是锌合金的，耐磨性好，经久耐用。

The base material of the old handle and the square shaft is plastic, which has poor wear resistance and is not durable. The base of the new handle that contacts the square shaft is zinc alloy, which has good wear resistance and durability.
