

把手特点

Handle Features

1、把手全部采用压铸铝-纯国标铝，外观遵照人体工艺学（如下图），握感舒适，动力和用力部件采用 5# 锌-压铸锌，多点小齿结构传动更顺畅！

All the handles are made of die-cast aluminum-pure national standard aluminum, the appearance follows ergonomics (as shown below), and the grip is comfortable.

The power and force components adopt 5# zinc-die-cast zinc, and the multi-point small tooth structure transmission is smoother!

2、表面粉末及氟碳使表面喷涂更耐用，达到数十年不变色的技术标准，实现了适用和持久！

The surface powder and fluorocarbon make the surface spraying more durable, reaching the technical standard that has not changed color for decades, and has achieved application and durability!

(1) 金属粉使其更坚硬耐磨

Metal powder makes it more harder and wearable

(2) 荧光粉让您在每个夜晚感受到家的温馨，更人性化。

Phosphor powder makes you feel the home warmth and more humanity of every night.

3、把手为公司自主研发，从窗到门视觉的统一一致，使其看起来更协调一致，给人一种赏心悦目的感受！有别于市场常规产品，亦可避免激烈的市场竞争。

The handle is independently researched and developed by the company, and all the vision from the window to the door is unified, making it look more coordinated and consistent, giving a pleasant feeling! Its different from conventional products in the market, fierce market competition can also be avoided.
